Frameworks: Django, Flask, Bootstrap, Django REST Framework

AI/ML: Machine Learning, Deep Learning, CNN, NLP, RAG Concepts, Gemini API

Databases: SQLite, MySQL

Libraries & Tools: NumPy, Pandas, TensorFlow, Git, GitHub, VS Code, Jupyter Notebook, Anaconda, Render

Authentication: Django Authentication, Google Auth

Projects

AI Interview Mirror 2026
AI-Based Interview Preparation Platform *Python, Django, Gemini API, Google Auth, Bootstrap*

- Developed a Django-based platform to help users practice interviews and improve job readiness
- Built mock interview and resume analysis modules with responsive UI using Django templates and Bootstrap
- Integrated Gemini API for AI-based responses and Google Auth for secure user login

StudyMate AI RAG Chatbot 2026
Notes-Based AI Study Assistant *Python, Django, Gemini API, RAG Concepts, Bootstrap*

- Built an AI-powered chatbot to help students ask questions from study notes and receive relevant answers
- Designed Django backend logic and chatbot interface for smooth student interaction
- Integrated Gemini API with RAG concepts to generate context-based answers from study content

Cervical Cancer Detection Web Application 2026
Medical Image Classification Project *Python, Django, TensorFlow, CNN, Bootstrap*

- Developed a medical diagnosis web application for cervical cell image classification
- Created an image upload workflow to process cervical cell images and display prediction results
- Trained and integrated a CNN-based deep learning model, achieving 90% test accuracy
